## Profile Summary

Software developer with a strong interest in building scalable and reliable systems. Experienced in turning ideas into products through end-to-end application development, with a focus on performance and practical user needs.

## Skills

|                           |                                                                                       |
|---------------------------|---------------------------------------------------------------------------------------|
| <b>Programming</b>        | JavaScript (ES6+), TypeScript                                                         |
| <b>Frontend</b>           | React.js, Next.js, Redux Toolkit, Tailwind CSS                                        |
| <b>Backend</b>            | Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO                         |
| <b>Architecture</b>       | REST API Design, Repository Pattern, MVC Architecture, Authentication & Authorization |
| <b>Databases</b>          | MongoDB, PostgreSQL, Redis                                                            |
| <b>Cloud &amp; DevOps</b> | AWS (EC2, S3), Docker, Nginx                                                          |
| <b>Integrations</b>       | Razorpay, Google Maps API, WhatsApp Cloud API, Cloudinary                             |
| <b>Tools</b>              | Git, GitHub, Postman, VS Code                                                         |

## Projects

### Zomestay – Hospitality Management SaaS Platform

[Live](#)

A hospitality management SaaS platform built with a centralized architecture serving multiple applications and user roles across the hospitality ecosystem.

**Tech:** React.js, React Native, Next.js, Node.js, Express.js, MongoDB, TypeScript, AWS

- Built a hospitality management SaaS platform with a centralized backend architecture
- Developed 5 frontend applications connected to the same backend system
- Built a React Native mobile application integrated with shared APIs
- Implemented booking systems, calendars, pricing management, dashboards, and role-based access control
- Developed scalable REST APIs, authentication systems, and payment workflows
- Designed and deployed cloud infrastructure on AWS for production environments

### Task Kerala – Membership Management Platform

[Live](#)

A web-based membership management platform designed to help organizations manage members, events, registrations, payments, and certifications through dedicated administrative and member portals.[2pt] **Tech:** React.js, Node.js, Express.js, MongoDB, Razorpay

- Developed a membership management platform with separate Admin and Member dashboards
- Built event creation, registration, notification, and member management workflows
- Integrated Razorpay payment gateway for membership subscriptions and event registrations
- Implemented automated certificate generation and member activity tracking
- Developed secure REST APIs, authentication, and role-based access control

## Mini Projects

### Nysha Beauty Lounge – Salon Management & Booking Platform

[Live](#)

**Tech:** MongoDB, Express.js, React.js, Node.js, Cloudinary

- Developed a MERN-based salon management and appointment booking platform for a Dubai-based beauty salon
- Implemented customer, service, and appointment management workflows
- Integrated Cloudinary for media storage and optimized responsive user interfaces

### Ghaya Institute – Educational Institution Website

[Live](#)

**Tech:** Next.js, Node.js, Express.js, MongoDB

- Redeveloped the institution's website based on the client's existing design and branding requirements
- Built responsive pages using Next.js while preserving the original user experience
- Improved performance, maintainability, and cross-device compatibility

## Dr. Chiller – HVAC & Refrigeration Service Website

[Live](#)

**Tech:** React.js, JavaScript, Tailwind CSS

- Developed a business website for an HVAC and refrigeration service provider
- Built responsive interfaces and service-focused landing pages
- Improved lead generation through performance and SEO optimization

## Education

---

### Professional Training – Full Stack Development (MERN Stack)

*Apr 2024 – May 2025*

*Prototype*

- Built and deployed full-stack web applications using React.js, Node.js, Express.js, and MongoDB
- Developed scalable REST APIs, authentication systems, and database-driven applications
- Implemented payment gateway integrations, third-party APIs, and real-time application features
- Worked on production-style projects following modern software development practices
- Strengthened skills in debugging, performance optimization, version control, and clean code principles

### Bachelor of Business Administration (BBA)

*2018 – 2020*

*Kannur University*

*Coursework Completed*

- Completed undergraduate coursework in business administration with exposure to management, finance, marketing, and organizational studies
